- Deoxyribonucleic Acid
- Ribonucleic Acid
- Ribose Sugar
- Deoxyribose Sugar
- Double Sided
- Single Sided
- Double Helix
- Adenine
- Thymine
- Guanine
- Cytosine
- Uracil
- Made by Replication
- Made by Transcription
- Moves from the nucleus to cytoplasm
- Stays in the nucleus
- The ribosome reads it to make proteins
- Contains Phosphate
- Needed for Protein synthesis
- Found in Prokaryotic cells
- Found in Eukaryotic cells
- Nucleic Acid
- Composed of Nucleotide
